Pterodactyl Panel

- About the Panel

About the Panel

TechGarage runs game servers on **Pterodactyl Panel**.

- Panel: https://panel.techgarage.ca
- If you have a server with us, you log in there to start/stop, use the console, and manage files.

How-to pages for updating Paper, a proxy, or Geyser live in the book **Managing a Minecraft Server**. Those pages still say Pterodactyl; they are the same panel, even if some screenshots are old.

Do not post panel passwords, Wings tokens, or node IPs on this wiki.
