

Techgarage Internet Access

Welcome to **TechgarageBeacons**, the network of Wi-Fi access points powered by TechGarage. Whether you're grabbing a quick connection on our free node or planning to roll out one of our upcoming paid beacons, this guide will help you understand how to connect, what to expect, and where to get support.

Our first node, **TechGarage.ca Free WiFi**, provides open, no-login internet access via its SSID. Simply select **Techgarage.ca Free WiFi** in your device's wireless settings—no password or captive portal is required.
