ScrubCraft: A TechGarage Project

Welcome to the ScrubCraft Project, a premier Minecraft server built on top of the TechGarage platform. This project serves as a free, high-quality server that demonstrates the immense potential of TechGarage.ca, offering an unparalleled Minecraft experience.

About ScrubCraft

ScrubCraft is not just a single server but a cluster of various Minecraft servers, each offering unique gameplay experiences. At the heart of this cluster is the **ScrubCraft SMP** (Survival Multiplayer), the main server where players can immerse themselves in a rich, engaging world.

Key Features

- **High-Quality Performance:** Leveraging the robust infrastructure of TechGarage.ca, ScrubCraft ensures smooth, lag-free gameplay with high uptime and reliability.
- **Community Focused:** ScrubCraft is built with the community in mind, providing a friendly and welcoming environment for players of all ages.
- **Innovative Gameplay:** Experience a variety of game modes and custom features designed to enhance your Minecraft adventures.

How to Join

- **Server IP:** To join the ScrubCraft SMP, simply connect using the IP address `Scrubcraft.ca`.
- **Server Map:** Explore the world of ScrubCraft in detail by viewing the live map at <http://techgarage.ca:8026/>.
- **ScrubPlace Map:** Explore the world of ScrubCraft in detail by viewing the live map at <http://techgarage.ca:6969/>.

Why Choose ScrubCraft?

Demonstration of TechGarage's Potential

ScrubCraft stands as a testament to the capabilities of TechGarage.ca. By integrating cutting-edge technology and robust server management practices, ScrubCraft provides a seamless and enjoyable Minecraft experience, showcasing what TechGarage can offer to the gaming community.

Variety and Flexibility

Whether you're a fan of traditional survival gameplay, creative building, or custom mini-games, ScrubCraft has something for everyone. Our cluster of servers ensures that you always have new and exciting adventures to embark on.

Dedicated Support

Our dedicated team is always here to help. If you encounter any issues or need assistance, feel free to reach out to our support team through the TechGarage platform or join our community on Discord for real-time help and updates.

▣ The Story of ScrubCraft ▣

Chapter 1: Foundations

In the beginning, Sulack, the mysterious creator, built the world of ScrubCraft in ways no one fully understands. To protect his creation, he placed a barrier that covered 10,000 blocks in every direction from the center of the world. At the heart of this region, Sulack created [Modtown](#), a thriving marketplace led by his trusted follower, Kcalus. [Modtown](#) quickly became the central hub for trade and activity in the growing world.

Over time, a figure named JstormFL appeared. No one knew much about his past, but he soon gained followers and founded the [Kingdom of Jenava](#), located south of the Bay of Epirus. Along with his kingdom, JstormFL built a church dedicated to his teachings, spreading his influence. The Bay of Epirus later became the site of a significant event when Sulack summoned the grand Tower of Spawn, a towering structure that still stands as a symbol of his power.

Soon after, another player, Ben2790, joined the world. With help from Wither, Ben established the nation of Copotia. Unfortunately, Copotia's existence was short-lived. The nation faced constant attacks from terrorists like MinnietheCat1 and RickMC, who looted and caused chaos. The repeated invasions forced Copotia to collapse, and the survivors fled to Wither's hidden mansion in the east. There, they built a small village to try to reconnect with other members of Copotia. However, the peace didn't last long. MinnietheCat1 launched another attack, burning the village to the ground and leaving only the mansion standing.

Determined to fight back, Ben2790 led the remaining Copotian Exiles beyond Sulack's protected barrier into the wild lands. In the snowy tundra, they founded Area 52, a military base where they began working on a secret weapon to stop MinnietheCat. After months of research, they developed an ICBM nuclear weapon. However, they couldn't find a safe place to test it, so it stayed locked away in a silo. Despite this, the exiles expanded their efforts, establishing Area 53 near the Bay of Epirus and Area 54, a hidden mountain stronghold. Yet, time took its toll, and many of the exiles didn't survive long enough to see their plans succeed.

Meanwhile, the War of the Axes broke out. [The Kingdom of Fridea](#) fought against MinnietheCat's terror group, which was supported by his ally, 11Ninjas. The war was brutal, lasting six months and resulting in heavy losses. During the conflict, Minnie's forces assassinated Syntax of [Syntaxia](#), pulling his followers into the war. [Jenava](#) also became involved, clashing directly with Minnie's group. Despite the chaos, [Jenava](#) used the opportunity to expand its empire, building new cities and gaining control over smaller states.

Amid the fighting, a mysterious individual founded [Eclipse Haven](#), a refuge for people displaced by the War of the Axes. Located just south of [Jenava](#), this sanctuary provided safety for many. However, Eclipse Haven depended on [Jenava's](#) protection and was closely tied to the empire's fate during the war.

The constant violence made it almost impossible for new players to settle in ScrubCraft without being targeted by the terrorists. However, the Copotian Exiles struck a major blow by infiltrating RickMC's camp. A spy gathered valuable information, which led to a successful raid and the killing of RickMC.

With one terrorist eliminated, the allies turned their attention to MinnieTheCat. They launched a relentless campaign, tracking Minnie's every move. The pressure mounted, and Sulack eventually exiled MinnieTheCat and 11Ninjas from the protected 10,000-block region. Believing they were safe, the pair hid their base far in the uncharted wilderness. But Minnie made critical mistakes, including using dark magic to duplicate items. This left a trail that [Jenava's](#) forces followed to locate the hidden base.

Realizing the opportunity, JstormFL approached the Copotian Exiles at Area 52. He asked them to use their nuclear weapon to destroy MinnieTheCat's stronghold. With Ben and Joshtin1 leading the decision, the exiles agreed and prepared the missile. They launched the nuke and traveled with [Jenava's](#) entourage to witness the event. When they arrived, they saw the massive explosion that obliterated Minnie's base.

After the attack, MinnieTheCat1 and 11Ninjas were captured and imprisoned in [Jenava](#). Following a period of deliberation, it was decided that they would be executed by being burned at the stake. Their fiery execution marked the end of their reign of terror and brought hope back to the people of ScrubCraft.

[Watch the reenactment of their execution here: https://youtu.be/VZGn9xAoq_s?si=445EVJQ-A-NGUBKb&t=619VAXwQV6kgx&t=61]

Chapter 2: The Entity

Chapter 3: Ascension

On July 20th, a mysterious message was sent to the people of ScrubCraft. This transmission, originating from The Smile, was received in the Transmission Room of the Imperium of Eclipse Haven, with The Lead Disciple responding. The message was encoded in a way that only a select few could decipher. There's a rumor that reversing the audio might reveal its true meaning. You can watch the video here: [First Transmission](#).

Following the release of the First Transmission, concern spread throughout ScrubCraft. The video's cryptic instructions led players to search for Bob, who was found floating above spawn. Bob directed them to the original base of The Lead Disciple, from before the infection: Copotia, a city destroyed by the Disciple soon after the infection began. In the ruins, players discovered a mysterious black blob containing a code. This led them to The Smile's Maze and, eventually, to an access point for the Conference Room—a location seen in the transmission.

Players continued to explore and found themselves at The Smile's Manor, which eerily resembled the manor at the center of the Imperium of Eclipse Haven. In their search, they uncovered the Transmission Room, the origin of the message, along with a note left behind by The Lead Disciple.

Meanwhile, The Smile's growing power manifested in a new prison that trapped many players of ScrubCraft. Officer Brown, a puppet of The Smile, appeared at the spawn tower, where players typically feel safe. He deceived them into entering his police car, locking them in cells. However, players eventually managed to escape by collecting various items in the prison and defeating guards. They commandeered an escape helicopter, only to discover they were trapped in an artificial box, not a real-world prison. Crashing the helicopter through a wall finally returned them to the overworld.

Decoding a previous message left by The Lead Disciple, players were led to the origin of the world. There, they encountered a fairy called The Origin, who instructed them to jump into a void. This leap led them straight into The Lead Disciple's trap—a massive maze. After hours of navigating the maze, they uncovered a special item meant to be used against the Lead Disciple. When they finally found their way out, they confronted The Lead Disciple, and with the item, obtained a disc containing the second transmission from The Smile. Watch it here: [Second Transmission](#).

Rumors spread across the land of ScrubCraft, drawing players back to spawn, where a mysterious portal awaited them. This portal led to the Isle of Time, an ancient realm governing the flow of time in ScrubCraft. Upon arrival, players found the Cherry Village, a settlement crafted entirely from cherry wood. Here, villagers hinted at paths leading deeper into the island, guiding players to venture into the ominous Night Forest.

As they explored, players discovered a ruined village overrun by zombies. One elderly man, a lone survivor who had sheltered in his home, still held an old scythe, a relic from past battles. He urged them to continue through the forest to seek the legendary Time Castle, an ancient stronghold rumored to house the essence of time itself.

When players reached the castle, they found themselves at its base, challenged to climb to its summit. At the top, they encountered The Smile, who revealed he had long controlled the Isle of Time. Now, with access to the main world, he was finally ready to welcome others into his "paradise."

Empire of Jenava

[Jenava Dynmap](#)

Jenava is a historical kingdom, later turned into an empire, which became the largest the world had ever seen. It dominated the continent of Sulandria both militarily and economically, establishing control over the southern continent and large parts of the continent to their south through conquest, annexation, and colonization. Jenava originated as a city on the southernmost tip of a desert peninsula.

Founding Legend

The legendary founding of Jenava is attributed to King Storm, driven by a vision of a promised land. Accompanied by his cousins, Daan and Toine, his friends, Samantha and Max, and his wife, Simone, he embarked on a journey through harsh landscapes, over mountains, rivers and seas. Their expedition eventually led them to a vast desert sea, which they decided to traverse. This journey however became a desperate fight for survival, claiming many lives, including that of Storm's beloved wife, Simone.

As morale plummeted to an all-time low, they glimpsed the shadow of a great dragon. Deciding to follow it, they were led to a desolate island. Interpreting this as a divine sign, they established the city of Jenava there. Whether the Jenavans truly saw a dragon or if it was a mirage caused by the extreme desert climate remains a mystery.

Early History

Jenava's early days were fraught with hardships, including famine, disease, and raids. The harsh desert climate hindered crop cultivation, making food incredibly scarce. Starvation and sandstorms led to many deaths, and the intensive labor for the city's construction drove some to desperate measures, including jumping off the scaffolding to escape hunger. Child mortality rates were also alarmingly high during this period.

Fishing eventually helped stabilize the food scarcity, and the crisis was further alleviated when Max discovered a method to make the land surrounding the city arable for wheat. Trade relations with the Traders Guild to the north brought economic prosperity, with Jenava lending its architectural expertise in exchange for diamonds. Mickeau, an influential trader and general, colonized the western tip of the continent, including the Isles of Grape, establishing a lucrative iron colony.

Conflict arose however when the Kingdom of Prevabia launched an attack on Jenava, destroying parts of the outer city, including King Storm's home, and decimating the flourishing colony to the west. In retaliation, Mickeau and Storm led a siege on Prevabia's castle. Although Mickeau perished during the assault, the attack was successful, leading to the execution of Prevab, the leader of Prevabia, and the destruction of his castle.

During this time, significant reserves of gold, netherite, and especially iron were discovered in Jenava's mines, ushering in a new era of growth and prosperity. However, this growth attracted raids from a group of brigands. The capture and punishment of these brigands, made possible by the betrayal of one of their own, Rammy, solidified internal security. The captured brigands were sent to the sandstone mines as slaves.

The Imperium of Eclipse Haven

Founded before November 2021, the exact date is unknown.

The exact founders are all unknown and have now become myths. In tales found in the Imperium's vaults, the settlement of Eclipse Haven was created to escape the growing escalation of the war in the land of ScrubCraft.

The Imperium is located on the border region of the Jenavan Empire. It is a man-made taiga island that acts as the barrier between the Jenavan Sea and the Eclipsian Sea (aka the Sethian Sea). The Imperium Castle is the center of government at Eclipse Haven, with a surrounding town being the major city of Eclipse Haven. The town has a shopping market behind the castle, with living spaces in front of the castle that hold the elite trade boats and cannons of Eclipse Haven.

The Imperium holds the Church of Sulack, a religion formed during the trying times of the War of the Axes. The culture, in general, is a mix of many people, from refugees who fled to the land during the War of the Axes to military leaders of governments whose land was occupied or unsafe.

The Imperium has had multiple governments, originating with a single leader elected by the people to a consulate of three, with the 1st consul in charge of the government, the 2nd in charge of foreign diplomacy and the military, and the 3rd in charge of the judgment system. The only consulate government was the first one led by YvartheNerd, Ben2790 [Regular Ben], and Drafty09, each being the respective consul. In the absence of YvartheNerd and Drafty09, the 2nd Consul dissolved the government and replaced it with a dictatorship under him.

The military of the Imperium of Eclipse Haven is the second-strongest in the land of ScrubCraft. Led by Consul Ben, the Imperium was able to contribute to the Board of Nations to stop the ongoing terrorism threat in ScrubCraft. Eclipse Haven was also a founding member of The Coalition: Against Terrorism. The Imperium of Eclipse Haven has annexed many territories that have stories as well; these include Areas 52, 53, 54, and the Magical Province of Subterraria.

The Areas were created by Regular Ben and Jostin1 during the War of the Axes, which was the war to defeat MinniTheCat and his associates. The territories were created as places of refuge for those affected by Minni's terror. Area 52 also developed the first nuke in ScrubCraft history. Once the Empire of Jenava found the location of Minni's base, Ben launched a nuke and flew over to watch the explosion with members of Jenava. Once Ben became the Consul of Eclipse Haven, he decided to have the Areas formally annexed by Eclipse Haven, even installing a Nuclear Silo in Eclipse Haven with a launch room locked in the sewers of Eclipse Haven. The Province of Subterraria was annexed due to growing aggression by Howlshadow and the newly founded Imperium's interest in the magic found in the ancient rocks in the province.

The Imperium created a shopping district called Dingleway in the Bay of Epirus due to worries about Eclipse Haven becoming a Jenavan puppet state. A standard currency was also created due to the growing inflation of diamonds in ScrubCraft, called the Yvar Dollar after the first consul.

In modern days, the Imperium has become less hostile and has been acting as the de facto head government of the Board of Nations due to the inactivity and isolationist policies of other nations. Recently Regular Ben has ascended to a new plane of existence and has become a god. This left br.Ben2790yt as the new leader of Eclipse Haven.
